School teacher
Seine-Saint-Denis - 2011 to 2019

MY JOURNEY

After 8 years as a school teacher, I decided to retrain in Web & Mobile development by following *Le Reacteur bootcamp*.
I was then recruited there as a developer and as a teacher. During my 2 years at Le Reacteur, I was able to deepen my knowledge of React and React Native, and discover new technologies through personal projects.

In November 2021, I was recruited as a FrontEnd Web Developer at *Mazarine Digital*. I work on two axes of the Chanel project : the edition of web pages for their website, and the maintenance of the application.

MY PROJECTS

You will find my personal projects on my GitHub profile and in my portfolio :
